DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1 – 32 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Barber (Patent 6,502,193).

As per Claims 1, 5, 9, 14, 20 and 26, Barber teaches “acquiring a security code, receiving media containing said security code, translating said security code to an IP address corresponding to said second communication device and routing said receiving media to said second communication based on said IP address of said second communication device, said IP address of said second communication device remaining anonymous to said first communication device”. See Column 5 line 41 – Column 7 line 18.

As per Claims 2 – 4, 6 – 8, 10-13, 15 – 19, 21 – 15 and 27 – 32, Barber teaches “Pin code; security code is valid to at least one time; first communication validation”. See Barber Column 5 line 41 – Column 7 line 18.

Conclusion

Examiner's Note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO Form 892. Applicant is urged to consider the references. However, the references should be evaluated by what they suggest to one versed in the art, rather than by their specific disclosure. If applicants are aware of any better prior art than those are cited, they are required to bring the prior art to the attention of the examiner.
